Join us at the Tribal Traffic Safety Summit to discuss issues, learn from one another, and begin developing solutions for improving safety on Tribal roadways in Washington State. The Summit is designed to assemble transportation safety stakeholders on a statewide and local level to discuss safety issues affecting Washington State's Native American roadways and ways that can help reduce fatalities and serious injuries.

The first half-day of the Summit will provide a high-level overview of Washington's Tribal road safety issues; information on the importance of the multidisciplinary, data-driven approaches to safety; and an introduction to Washington's strategic highway safety plan, known as Target Zero. This will be followed by breakout groups organized by the 4Es of safety (engineering, education, enforcement, and emergency medical services) to discuss and develop specific recommendations for advancing Tribal safety efforts at the statewide and local level. Those recommendations will be the focus of a moderated discussion on the second day to help clarify the next steps needed and to identify resources toward implementing them.

An informal dinner in the evening of day one will offer participants additional opportunities to network with various organizations and agencies, in addition to visiting several resource tables with the emphasis on promoting traffic safety.

We are excited about your participation in this important Summit.

• Engineering • Enforcement • Education • Emergency Response

For additional information, please contact Mary Frascona at 850.671.0214 or mfrascona@camsys.com.

May 27 – May 28, 2009
